

## Board Excellence announces its accreditation by the Chartered Governance Institute (CGI) for independent board reviews

As a leading provider of board reviews in the UK, Ireland and internationally, Board Excellence are delighted to announce that we have been awarded accreditation by the Chartered Governance Institute (UK & Ireland) for board reviews.

We strongly support and align with the CGI Code of Practice for board reviewers and incorporate these principles in our board reviews of listed companies, corporates, private companies, public sector and charity/non-profit organisations.

Commenting on the announcement of the CGI Accreditation, Kieran Moynihan, Managing Partner, added; *"The Board Excellence team are great believers in the power of Board Performance Reviews as a basis of supporting Boards to continuously improve and for helping individual Directors understand how Boardroom practice is evolving and how others are tackling common challenges. Board Performance Reviews underpin the trust that shareholders and stakeholders assign to Boards and help Boards and Directors excel on their behalf. Board Performance Reviewers need to be independent, willing to challenge and follow a thorough and robust process.*

*With that in mind, we are delighted both to reconfirm our commitment to following the Chartered Governance Institute's (CGI) Guide to Board Performance Reviews and to announce that we have been awarded CGI accreditation for our Board review services. Accreditation will provide further trust in the quality of our work as we continue to develop our rapidly expanding UK, Irish and International business.*

*We are passionate about delivering high-quality Board Performance Reviews that play a critical role in helping Boards understand their current level of effectiveness, governance and performance, how they compare to the best comparable peer boards and the practical steps needed to drive sustained improvement in the Board's effectiveness, governance, performance and value-add."*
